Friendship Fortune

You will need:

Fortune printout (provided in a separate link)
2 dice for each group

Divide the class into pairs. Each person in the group will take turns being a fortune teller. The fortune teller will take a turn rolling the dice and then opening and closing the fortune vertically and horizontally the number of times on the dice. Open the fortune and read the question on the fortune for the number rolled. If the number is greater than six, then subtract the total from 6 and read the resulting number. For example, if a student rolls an 8, then the student should read number 2. The fortune-teller asks the question to the partner and the partner answers the question. After the question is answered, the person who answered the question now becomes the
