### ATTWOOD CARB CERTIFIED FOR CARBON CANISTERS

**LOWELL, Mich. (May 14, 2018)** – The California Air Resources Board (CARB) has granted Attwood Corporation a component Executive Order (RM-18-004) for its Trailerable<sup>1</sup> Carbon Canisters used in its Integrated Carbon Canister Fuel Systems.

The Executive Order indicates that boats equipped with Attwood's [99CC035/045/085 Series Carbon Canisters](#) are approved and CARB compliant for the 2019 model year. These Carbon Canisters also meet the requirements and are certified by the U.S. Environmental Protection Agency (EPA). CARB's rating is slightly different than the current EPA rating. Visit <http://www.attwoodmarine.com/store/product/integrated-fuel/carbon-canisters> to learn which canister is recommended for your application.

Attwood's Carbon Canister design has been validated through CARB's extensive durability procedures and features the same proven construction since its first release in the summer of 2011. Attwood is presently in the process of further acquiring certification for its Non-Trailerable Carbon Canister. Attwood is the preferred choice for boat builders, with over 400,000 Attwood Carbon Canister Systems currently on the water.

<sup>1</sup> "Trailerable" refers to any SIMW that is less than or equal to 26 feet in length and less than or equal to 8.5 feet in width.

### About Attwood

Attwood Corporation has been an award-winning leader in the design, development, testing, and manufacturing of the highest quality boat parts and accessories in the marine industry for over 100 years. Today, Attwood is a broadly diversified supplier of navigational lighting, pumps and blowers, fuel accessories, electrical products, gas springs, trailer components, boat seating, boat covers and boat bimini tops – everything you need to make life on the water safer and easier to enjoy.
