

MASTRY BEGINS 2018 BY OPENING 10TH SUZUKI REPOWER CENTER

Mastry Engine Center begins 2018 with the launch of its 10th Suzuki RePower Center. Cocoa, Florida-based Marine Pro of Central Florida Inc. joins the rapidly expanding network of certified sales and service facilities.

A long-time Mastry distributor for Yanmar, Marine Pro of Central Florida offers a wide range of mechanical and electrical services. As a Suzuki RePower Center, it leverages its team of highly trained technicians, and fabrication and machine shop. In addition to its Cocoa, Florida facility, it has a waterside location at Port Canaveral Marine. Its website is www.marinepro.us.

"We're pleased to welcome Marine Pro," said David Taylor, Suzuki RePower by Mastry sales and marketing. "They've been a Gold Yanmar Service dealer for years and will be an important part of our Suzuki RePower team."

As engines age and decline in performance, the boats they power are often in like-new condition. This is why repowering with a high-performance, 4-stroke Suzuki makes so much sense. It brings renewed life to a vessel at a fraction of the cost of buying new.

Since 1962, Mastry, a Yanmar company, has been the source generations of boaters turn to for marine power. Supported by a vast dealer network, it is renowned for its customer support and education programs.
