

For Immediate Release

Seatorque Control Systems name Halyard as exclusive distributor for the UK, Europe and Scandinavia.

It was announced today that Halyard, an industry leader in the design and development of sophisticated and specially designed exhaust systems headquartered in the UK, has been selected by Seatorque Control Systems as its exclusive distributor for the European and Scandinavian markets.

U.S. based Seatorque is the developer of leading-edge technology propulsion systems including its acclaimed BOSS Bolt-On Shaft System. This unique enclosed system is an oil-filled, self-contained shaft and thrust bearing assembly that dramatically reduces friction, underbody drag, engine vibration, noise and mechanical losses while it increases power for propulsion.

“We are thrilled to join forces with Halyard and eagerly look forward to working with them in the future” said Seatorque Executive Vice President, Jana Stolper. “Their ability to offer exceptionally designed engineering solutions and superb customer service made Halyard a natural partner for us as we expand our customer base throughout Europe” adds Stolper.

David Johnson, Sales Director at Halyard commented “Seatorque produces an exceptional range of propulsion systems that perfectly align with our Halyard family of products. Halyard’s tagline is “The Science of Silence”. Adding Seatorque to our product mix means we can emphasize this focus and advance it further with improved performance through reduced vibration and a more efficient use of thrust from the engines and propellers.”

Halyard will be promoting and exhibiting Seatorque equipment at the upcoming SEAWORK Show in Southampton, United Kingdom, June 11th – 13th, Booth PG117. SEAWORK is the largest European commercial marine exhibition held at the prestigious Mayflower Park venue.

Seatorque Control Systems: Founded in 1994 by Peter and Jana Stolper, the company has evolved into the leading inboard driveline technology engineering and manufacturing company in the world. A winner of multiple international innovation and design awards, Seatorque has become propulsion partner to the most respected builders in the industry.
