SeaHunter Standardizes Seakeeper Stabilization

SeaHunter marks largest builder to standardize smallest Seakeeper 2

CALIFORNIA, Md. (May 13, 2019) – Seakeeper, the leader in marine stabilization, announces that SeaHunter Boats will standardize the Seakeeper 2 on all new SeaHunter 31 and 33 models, making the largest standardization to date of Seakeeper’s smallest model. SeaHunter will also standardize Seakeeper on new 35, 39 and 45 models.

“Seakeeper is becoming a standard in the industry, and we’re committed to making boat roll a thing of the past,” said Seakeeper President & CEO Andrew Semprevivo. “We’re very happy to partner with SeaHunter, who has proven time and again that not only do they make a rugged offshore boat, but that like us, they’re focused on the customer first and foremost.”

“Our owners know that we’re committed to making the best performing boats and to making their relationship with us everlasting through both sales and ongoing service,” said SeaHunter Boats Vice President Charlie Schiffer. “To have the best performing boats, we have to have the latest innovations and best partners. It was an easy decision to make Seakeeper a standard feature. Our owners deserve the best.”

The Seakeeper standardization across the aforementioned SeaHunter models is effective immediately for all future builds. For those with current orders already in place, a SeaHunter representative can assist with adding the Seakeeper option. In addition to installation in their new builds, SeaHunter is also becoming an authorized Seakeeper dealer for service and refit installations at the SeaHunter Marina at Manatee Bay in Key Largo, Fla.

About Seakeeper

Founded in 2003 by a successful entrepreneur and a naval architect, Seakeeper is the global leader in marine stabilization. Seakeeper’s innovative technology changes the boating experience by eliminating up to 95 percent of all boat roll, the rocking motion that causes seasickness, fatigue and anxiety. Since selling its first Seakeeper in 2008, the company has developed a growing catalog of models for an expanding range of boat sizes. Based in California, Maryland, USA, the company has more than 200 employees globally, based in the U.S., U.K., Italy, Germany and Singapore.

About SeaHunter Boats

Founded in 2002 in South Florida, SeaHunter Boats builds the best-riding offshore fishing boats, leading the industry in stability, control and comfort. Quality and innovative technology are built in, using the most advanced materials and latest manufacturing techniques. SeaHunter designs and manufactures seven models: Floridian 28, Tournament 31, 33, 35, 39, 45 (center consoles) and the 41' CTS catamaran. The company's commitment to customer satisfaction is manifested in each boat designed and built, plus in the continued SeaHunter customer service guarantee of trouble-free ownership.
