### **PURFUELS® E-FREE GAS NOW AVAILABLE IN MARYLAND**

Maryland will now have new access to ethanol-free gasoline.

January 22, 2025, Baltimore City, Maryland: Hyperfuels announced that the Canton Railroad Transload Terminal now has supply of PurFuels® 93 Octane premium reformulated gasoline available for loading. The gasoline is EPA compliant for RFG areas and is street legal.

The gasoline uses Isobutanol to replace ethanol to produce gasoline that is fully hydrophobic, repels water, and does not absorb moisture from the atmosphere. Purfuels® has been endorsed by the National Marine Manufacturers Association (NMMA) since 2015.

Several premium marine fuel additives have approved the use of their additives in this gasoline, enhancing its performance and broadening its appeal, namely Slipstream and ValvTect. Most importantly, this is the only ethanol-free gasoline that is street legal to be sold at marinas, gas stations, and convenience stores.

Most notably, PurFuels® ethanol-free gasoline can be dispensed from E85 gas pumps, and by offering multiple octane levels, the gasoline can be used in typical blender dispensers as regular, mid-grade, and premium gasoline. Inquiries from petroleum distributors are invited.

### **Advanced Fuel Solutions: Regional Partner and Marine Fuel Specialist**

Hyperfuels™ is proud to partner with Advanced Fuel Solutions (AFS) as the regional marketing company for New England and the Mid-Atlantic. AFS brings extensive expertise in fuel quality solutions and is uniquely positioned to support the growth of PurFuels™ ethanol-free gasoline in these regions. In addition to promoting PurFuels®, AFS will feature their proprietary marine product, Slipstream, as a premier additive to enhance performance and reliability for marine engines. Slipstream's advanced formulation works synergistically with PurFuels™ to deliver superior water-repelling capabilities, corrosion protection, and optimized engine performance, making it the go-to solution for marine applications.

## **About PurFuels®**

PurFuels® brand of fuels includes ethanol-free gasoline as well as other boutique fuels like nitromethane, methanol, and 2-cycle premix gasoline. PurFuels® is expanding out of the hardware store and into the gas station dispenser. PurFuels® is a trademark of HYPERFUELS, LLC

## **About Advanced Fuel Solutions Inc. (AFS)**

Founded in 1994, AFS is a leading developer of proprietary fuel-additive packages for various applications, including diesel, gasoline, biodiesel, marine fuels and home-heating oil. Committed to sustainability, AFS actively promotes low-carbon fuel solutions. For more information, visit [yourfuelsolution.com](http://yourfuelsolution.com).

## **About Hyperfuels**

Houston-based Hyperfuels distributes high-performance and alternative fuels, lubricants, and additives for performance engines. Since 1998, Hyperfuels has revolutionized the packaged fuel markets by creating a “grab and go” fuel canister with top-quality fuels such as Sunoco Racing Fuels®, PurFuels™, E-Free, and SynDiesel®. Hyperfuels leads the industry in the distribution of ethanol-free fuels (using Isobutanol and HydroGuard™ oxygenates) to marinas, fire and crash rescue operations, and small engine users.
